

Speck, David W. (1983). *untitled*. Drawing. Originally realised on a colour video display by a Commodore Business Machines VIC-20 with a VIC-1211 Super Expander. London.

An attempt was made in 2012 to reproduce the above drawing from the original BASIC language text published in Volume 1, Issue 4 of Commodore User magazine in January 1984. The text was copied onto a modern computer and the drawing was reproduced using software emulating the original hardware. The results were unsatisfactory so the original BASIC text was rewritten in PostScript and improved:

```
%!PS-Adobe-3.0 EPSF-3.0
%%BoundingBox: -121 -121 121 121
%%Creator: (David W. Speck)
%%CreationDate: (2012)
%%Title: (untitled)
/circle { 0 exch 0 360 arc } bind def
0 0
120 -8 56 { circle 4 add dup stroke } for
48 -6 0 { circle 2 sub dup stroke } for
```

The PostScript text has been embedded at the head of this page thereby causing the drawing to be realised each time this document is displayed or printed.

David W. Speck, London, 2014.
